

INFANT AND CHILD

Blood test collection locations

Most infants and children require special care and attention during blood collection. Before visiting one of our collection centres with your child, please call **13PATH** to ensure we are well prepared for your visit.

We recommend that you visit our collection centre at **Perth Children's Hospital (PCH)**, especially if your child is very unwell or your doctor has asked you to get the tests urgently. If you are unable to attend PCH, we recommend attending one of these hospital-based locations.
